#590/585 SERIES Pipe Guards & Bollards

These commonly seen products serve to protect dispensers and other components on a fueling island area from accidental vehicle contact. They are also used to protect small buildings, kiosks, walkways, and equipment located near drive-through areas.

We manufacture **U-Shaped Pipe Guards** in 3", 4" and 6" pipe sizes. We use Schedule 40 Pipe as standard and 90° welded elbows. **Straight Pipe Bollards** are available in a variety of round sizes 4" through 10", in schedules 10, 20 and 40. We also produce **Square Bollards** in 4", 6" and 8" tubing sizes and wall thicknesses of 1/8", 3/16" and 1/4". Bollards (round or square) may be ordered in any length. We supply these **Bollards and Pipe Guards** coated on the outside with a light grey primer as standard. They are also available with powdercoated exterior.
